Subject: Global Water Rate Increase

OPEN MEETING AGENDA ITEM

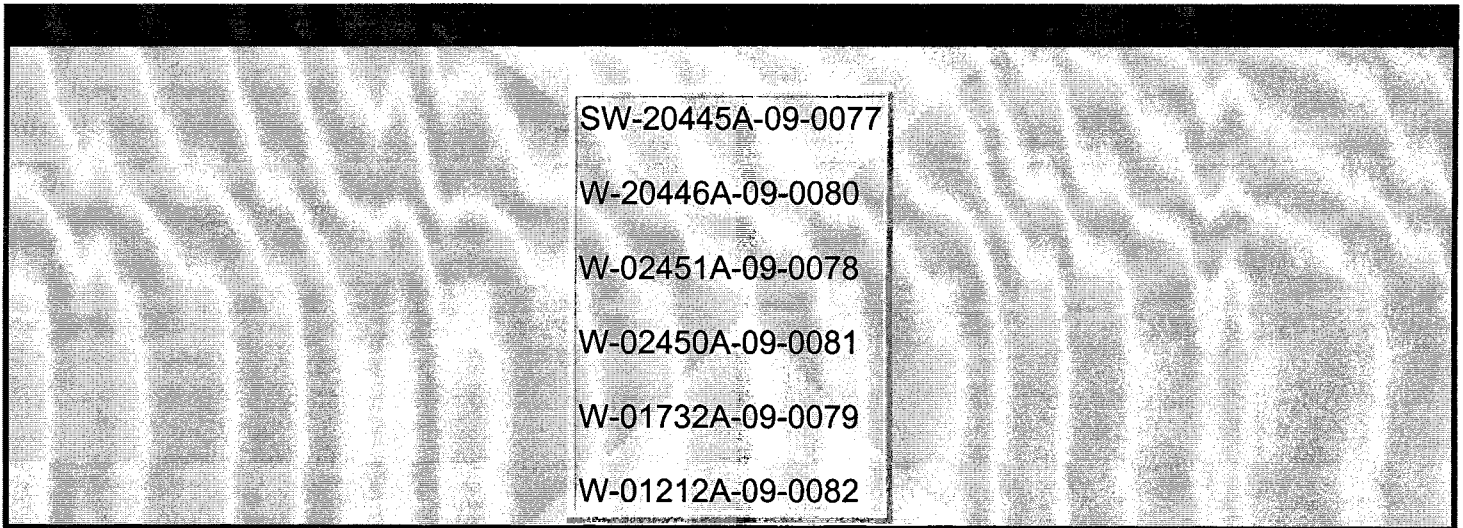

Gary,

My wife and I are Canadians who purchased a home in Province this past May. We have yet to live there but have great anticipation about our winter move. We'll both be retired by the time we move to Maricopa for the winter and will have a significantly reduced income. As I understand it, the proposal to increase the water rate will cause significant cost increase to the homeowner and to the HOA (which will find its way back to the homeowner). I'm very concerned that these increases will present a challenge to us financially, especially in light of the fact that we will incur normal moving expenses associated with outfitting and furnishing our new home.

If these rate increases go through it may put our retirement plan into jeopardy. Hopefully we won't have to sell our new home before we move into it.

The case numbers are below.

Thanks for your consideration.

Subject: Proposed Water Increase for city of Maricopa

Dear Commissioner Pierce,

We are sending this to you to ask that you be FAIR - Do NOT allow any increase in the water rates for the city of Maricopa, as proposed by Global Water. Investors in other fields do not receive increases in the present economy. Global should stated these figures 5 years ago when we came to Maricopa. They certainly knew then what they proposed to do in the near future. With the housing down turn, they are certainly placing the city and the residents in a tough spot. Thank you for your consideration.

We are retirees living on a fixed income in the Active Adult Community of Province, in the city of Maricopa where the Global rate case is hovering over all of the residents.

In these increasingly difficult economic times it is most unconsciounable to even request a rate increase, not to mention one of such significant increase, and to have this commission even consider it at all.

The threat of this increase will bring this city to not only a halt, but will probably be the cause of an extremely massive exodus of both residents and businesses. If Global Water investors are looking for a better return on their investments they need to look to a different market for such returns, the water delivery business is not where investors should be putting their money.

We implore you to use extreme caution in moving the commission through the pending rate case and to use even more caution when considering the judicial recommendation. It apparently is coming from a position that has already been bought and paid for.....there's nothing ethical about the judge's position, it is merely cloaked with money and power allegiances.

Please do not make light of the impact your ruling will have on this city and its residents. We are angry and we are motivated. As a matter of fact, we personally don't care if Global Water goes bankrupt.....they aren't providing us with any good services, the water quality is the worst we have ever had in Arizona, and they are proposing NOTHING to change that.

VOTE DOWN ANY RATE INCREASE FOR GLOBAL WATER.....
